PROFESSIONAL SUMMARY

Full Stack Developer passionate about building scalable web applications with **ASP.NET Core** and **Next.js**. Possessing hands-on experience in **managing full-cycle development** and orchestrating cloud/VPS environments for diverse projects. Seeking a professional environment to leverage technical expertise in solving real-world business challenges.

EXPERIENCE

FULL STACK DEVELOPER

Nov 2025 — Feb 2026

Nemark

Ha Noi

- **Project Coordination:** Managed development workflows to deliver 5+ diverse software solutions and MVPs.
- **Technical Execution:** Developed core backend using **ASP.NET Core** and optimized frontend with **Next.js/Angular**.
- **DevOps:** Orchestrated pipelines on Windows/Linux VPS using **Docker** and aaPanel.
- **QA & Standards:** Enforced strict **Code Review** (StyleCop) and Unit Testing (xUnit) to ensure maintainable codebases.

SOFTWARE ENGINEER INTERN (TEAM LEADER)

Sep 2024 — Jan 2025

FPT Software

Ha Noi

- **Leadership:** Led the development of a "**Mobile Phone E-commerce**" platform following enterprise-grade technical standards.
- **Management:** Optimized team performance using **Agile/Scrum** and contributed to the **System Architecture** design.
- **Project Delivery:** Successfully delivered a stable product demo that fulfilled all core business requirements and user workflows.

EDUCATION

BACHELOR OF SOFTWARE ENGINEERING

Sep 2021 — Dec 2025

FPT University

Ha Noi

- **Specialization:** .NET Technologies. **GPA:** 3.02/4.0.

SKILLS

Backend: C#, .NET Core 8, ASP.NET MVC/Web API, Entity Framework, LINQ, Winforms

Database: MS SQL Server (T-SQL, Stored Procedures, Triggers, Transactions, Index, View)

Frontend: TypeScript (ES6), Angular 18, Next.js, HTML5/CSS3, Bootstrap, jQuery, AJAX

DevOps & Deployment: Docker, VPS Management (aaPanel), IIS/Nginx

Testing & Quality: Unit Test (xUnit/NUnit), Selenium WebDriver

Tools & Methods: Git (GitHub), Jira, Agile/Scrum

Languages: English — B1 Intermediate

PROJECTS

LUMINA — AI-POWERED TOEIC PRACTICE SYSTEM

Sep 2024 — Dec 2025

Capstone Project · FPT University

Ha Noi

Role: Team Leader & Full Stack Developer (End-to-End Responsibility) **Description:** A comprehensive TOEIC practice platform with AI-driven automated scoring across all 4 skills (Listening, Reading, Speaking, Writing). **My Work:**

- Designed system architecture and RESTful API with **ASP.NET Core**; defined DB schema with **SQL Server**.
- Built full Angular 18 frontend including exam UI, result dashboard, and admin panel.
- Developed **Reading flow** — question sets, timed practice, and auto-graded result tracking.
- Developed **Writing flow** — essay submission with **AI-powered scoring** and feedback generation.
- Built **Mock Test** module — full 4-skill simulated exam with real TOEIC structure and scoring.
- Implemented **Articles + Take Note** feature — reading library with personal note-taking per article.
- Engineered **Exam Attempt** tracking — history, score breakdown, and progress analytics per user.
- Wrote **500+ test cases** (Unit test, Integration test, System test, AI result test) to validate scoring logic.
- Led sprint planning, task assignments, and code reviews for a team of 5.

Tech Stack:

ASP.NET Core API Angular 18 SQL Server xUnit Azure AI Docker

Highlights:

- Architected full system from scratch; led a team of 5 through the entire SDLC.
- Implemented **1,500+ test cases** (Unit & System Test) using **xUnit** to ensure AI scoring accuracy.

Role: Sole Developer (Design, Development & Deployment) **Description:** A full-stack **pharmaceutical e-commerce** platform with AI health consultation, real-time payment webhook, admin analytics, and role-based access control. **My Work:**

- Built full-stack pharmaceutical e-commerce with **Next.js 16 API Routes**, product catalog, cart, and checkout flow.
- Integrated **SePay payment gateway** with real-time webhook for automatic order status updates.
- Implemented **Google Gemini AI** health consultation chatbot via custom API routes with **conversation history**.
- Developed **admin dashboard** with revenue/order analytics (**Recharts**) and **Excel export**.
- Applied **role-based access control** using **Next.js Middleware** to protect admin routes.
- Optimized performance with **parallel Supabase queries** and **SWR** client-side caching; avg load **1.8s**.
- Deployed on **Vercel** with automated CI/CD from GitHub.

Tech Stack:

Next.js 16 (React 19)

TypeScript

Tailwind CSS v4

PostgreSQL (Supabase)

Google Gemini AI

SePay / VietQR

Recharts

SWR

Vercel

Highlights:

- Real-time **SePay Webhook** auto-updates order status; auth via Email/Password & **Google OAuth**.
- Admin analytics dashboard with **Recharts** (revenue/orders) and **Excel export**.
- Achieved avg. page load of **1.8s** via SSR, parallel queries, and **SWR** caching. Fully responsive 320px–1440px+.
- Live:** medimate-socuuyte.com
